

Dear Colleagues,

Maintaining 50 years of tradition, JUMV will proudly host the next International Automotive Conference to be held on 19/20 April 2017 in Belgrade, Serbia.

Since 1967 when it was established, this Conference became the most prominent international forums of Automotive Engineering in Serbia, Balkans and Central-Eastern Europe. It promotes exchange of engineering and scientific knowledge and experience at the highest quality level between experts from different countries, and offers an open forum place for views, ideas, experiences and expertise of experts from highly developed and other European countries.

The 2017 conference will hopefully demonstrate continuity, tradition, and improved quality of 25 previously held such engineering professionals and experts gatherings. It is an opportunity for participants to assess the development, applied scientific and engineering results of experts in automotive engineering, with particular emphasis to improved safety, but also to enjoy life in Belgrade.

The Conference will provide unique opportunities for participants to establish new professional and personal contacts, to exchange with other participants the results of their engineering activities, experience and expertise, and to learn more about automotive and supply industry in Serbia and the West Balkans region in order to open new business opportunities for their companies. Serbia is an EU candidate country offering challenging opportunities to all those willing to extend their business to this part of Europe.

The Conference is also an opportunity for foreign participants to learn more about Serbia, and to enjoy the traditional hospitality of this part of Europe.

This two day Conference is designed to consist of Special Technical Sessions and Presentation Panels (in English language) in addition to dedicated Workshop(s) (to be held in Serbian language). Special Technical Sessions will be organized and/or chaired by highly ranked international moderators in presentation panels.

Social Programme will also be included.

Traditionally, the structure of conference participants is such that over 75% participants are coming from abroad, representing academia, industry, governmental and non-governmental agencies and similar.

The Conference topics include but are not limited to:

- **Vehicle Safety (Safety 2017) - Vehicle & Traffic Safety, ADAS & Autonomous Driving, Braking, Accident Reconstruction & Analyses (AutoForIng 2017), Safety Regulations,**
- **Simulation in Automotive Engineering (AutoSim 2017),**
- **Advanced Powertrain - IC engines, Power Transmissions, ...,**
- **4E - EV/HEV & Alternative Energy Technologies, Transportation Greening, Environment Protection,**

- *Advanced Engineering Methods & Tools, and*
- *Automotive Logistics - Quality of Service, Reliability, Maintenance, After Sales, PLC, LMC, LCC,...*

JUMV kindly invites you to offer your paper proposal(s) at your earliest convenience but certainly not after 1 November 2016. Accepted papers will be published in the CD Conference Proceedings and/or in respectable international journals, like Advances in Mechanical Engineering (IF 0,575), just to mention one of them.

Paper offer(s) should consist of:

- *the tentative title of the proposed paper,*
- *name(s), affiliation and mailing address of author(s), and*
- *an Abstract of not more than 200 words (in English language).*

Paper offer(s) should also (in short):

- *state the main conclusion(s) of the paper,*
- *summarize the process by which the conclusion(s) were reached,*
- *state the contribution of the paper to the Conference topics, and*
- *indicate whether the paper has been offered to any other organization.*

Paper offer(s) are kindly requested to be submitted following the *Abstract Submission procedure - please see <http://nmv2017.jumv.rs/abstract-submission/>*

Useful information and links:

26th JUMV International Automotive Conference 2017 (<http://nmv2017.jumv.rs/>) will take place on 19-20 April 2017 in Belgrade Crowne Plaza Hotel (<http://www.ihg.com/crowneplaza/belgrade/>), Belgrade, under the FISITA Patronage (<http://www.fisita.com/events/diary/2017-jumv-international-automotive-conference-science-motor-vehicles>).
